SUBJECT INDEX

This subject index conforms to the categories established in The OR/MS Index, 1952–1976, 1976–1981. The 1952–1976 cumulative index was compiled by Kneale T. Marshall and F. Russell Richards, and the 1976–1981 cumulative index was compiled by John W. Tolle and Richard E. Stone. The indices were published in 1978 and 1983 by The Institute of Management Sciences and the Operations Research Society of America.

A

analysis of algorithms
Fischetti, Matteo, worst-case analysis, 849–858.

C

computers
Dinkel, John J., interval arithmetic, 859–866

cost/benefit analysis
Lee, Hau L., cost effectiveness models of physician education, 667–683

D

decision analysis
Lindley, Dennis V., combining opinions, 716–721

decision analysis, criteria
Farquhar, Peter H., forms of utility function, 206–214
decision analysis, risk
LaValle, Irving H., skew-symmetric bilinear preferences, 722–735
dynamic programming, applications
Soland, Richard M., sequential allocation of interceptor missiles, 537–542
dynamic programming, Bayesian
Lovejoy, William S., convex policy regions in partially observed decision processes, 619–621
Lovejoy, William S., partially observed Markov decision processes, 736–743
dynamic programming, deterministic
Bean, James C., state aggregation, 215–220
dynamic programming, Markov, finite state
Hopp, Wallace J., computations for nonhomogeneous chains, 875–883
Lovejoy, William S., convex policy regions in partially observed decision processes, 619–621
Lovejoy, William S., partially observed Markov decision processes, 736–743
dynamic programming, Markov, infinite state
Sheskin, Theodore J., successive approximations in value determination, 784–786
dynamic programming, optimal control
Chao, Hung-Po, Markov decision process, 274–281
Fuller, J. D., state constraint, weak planning horizon, 704–715
Ohno, Katsuhisa, optimal control of service rate, 121–126
dynamic programming, semi-Markov
Ohno, Katsuhisa, modified policy iteration algorithm with nonoptimality test, 121–126

E

economics
Chao, Hung-Po, economic interpretations and applications, 274–281
Modiano, Eduardo Marco, estimating demand for primary resources, 185–197
education systems, planning
Brandeau, Margaret L., medical school financial planning, 684–703
errata
Zahedi, Fatemeh, "Group Consensus Function Estimates When Preferences Are Uncertain," 627

F

facilities/equipment planning, capacity expansion
Lee, Sang-Bum, multifacility capacity expansion planning, 249–253
facilities/equipment planning, location
Dobson, Gregory, competitive location, 565–574
Granot, Daniel, location or public service facilities, 234–248
Hodgson, M. John, location-allocation, 221–233
Oommen, B. John, minimax location problem, 80–86
finance, investment
Clark, Ross, turn-of-the-year effect, 799–813
financial institutions, brokerage/trading
Clark, Ross, turn-of-the-year effect, 799–813
forecasting
Barnett, Arnold, prison population projections, 18–34

G

games/group decisions, bargaining
Chikte, Shirish D., two-person bargaining with search for outside alternatives, 198–205
games/group decisions, cooperative
Granot, Daniel, game theory application to location problems, 234–248
games/group decisions, gambling
Ethier, S. N., nonoptimality of bold play at craps, 814–819
games/group decisions, noncooperative
Brams, Steven J., deterrence, retaliation, tit-for-tat, threats, 524–536
government, services
Harris, Carl M., simulation and queueing, 504–523

H

health care
Brandeau, Margaret L., medical school financial planning, 684–703
health care, hospitals
Weiss, Elliot N., acute care services, 35–44

I

industries, agriculture/food
Glen John J., mathematical models in farm planning, 641–666
industries, communications

Number 1 January–February 1987

EDITORIAL 2

IN THIS ISSUE 3

OR PRACTICE

Computerized Vehicle Routing in the Soft Drink Industry 6
Bruce L. Golden and Edward A. Wasil

ARTICLES

Prison Populations: A Projection Model 18
Arnold Barnett

Administrative Days in Acute Care Facilities: A Queueing-Analytic Approach 35
Elliot N. Weiss and John O. McClain

Solving Mixed Integer Programming Problems Using Automatic Reformulation 45
Tony J. Van Roy and Laurence A. Wolsey

Optimal Time-Varying Flows on Congested Networks 58
Malachy Carey

Approximation of Pareto Optima in Multiple-Objective, Shortest-Path Problems 70
Arthur Warburton

An Efficient Geometric Solution to the Minimum Spanning Circle Problem 80
B. John Oommen

Modeling a Class of Flexible Manufacturing Systems with Reversible Routing 87
David D. Yao and J. A. Buzacott

Some Optimum Algorithms for Scheduling Problems with Changeover Costs 94
T. C. Hu, Y. S. Kuo and F. Ruskey

A Modular Approach to Optimal Multiple-Shift Manpower Scheduling 100
R. N. Burns and G. J. Koop

Deterministic and Random Single Machine Sequencing with Variance Minimization 111
Vina Vani and M. Raghavachari

Computing Optimal Policies for Controlled Tandem Queueing Systems 121
Katsuhisa Ohno and Kuniyoshi Ichiki

Statistical Analysis for Use with the Schruben and Margolin Correlation Induction Strategy 127
Ardavan Nozari, Steven F. Arnold and C. Dennis Pegden

TECHNICAL NOTE

Recognizing Unbounded Integer Programs 140
R. H. Byrd, A. J. Goldman and Miriam Heller

OR FORUM

The Beginnings of Operations Research: 1934–1941 143
Joseph F. McCloskey

Presidents' Symposium: Creating Growth in OR/MS 153
William P. Pierskalla

Presidents' Symposium: OR Elsewhere 157
Robert E. Machol

CONTRIBUTORS 161

Number 2 March–April 1987

IN THIS ISSUE 166

OR PRACTICE

A Utility Fuel Inventory Model 169
Peter A. Morris, M. James Sandling, Richard B. Fancher, Michael A. Kohn, Hugh-po Chao and Stephen W. Chapel

ARTICLES

Derived Demand and Capacity Planning under Uncertainty 185
Eduardo Marco Modiano

The Role of External Search in Bilateral Bargaining 198
Shirish D. Chikte and Sudhakar D. Deshmukh

Constant Exchange Risk Properties 206
Peter H. Farquhar and Yutaka Nakamura

Aggregation in Dynamic Programming 215
James C. Bean, John R. Birge and Robert L. Smith

The *P*-Centroid Problem on an Inclined Plane 221
M. John Hodgson, Richard T. Wong and John Honsaker

The Role of Cost Allocation in Locational Models 234
Daniel Granot

Multifacility-Type Capacity Expansion Planning: Algorithms and Complexities 249
Sang-bum Lee and Hanan Luss

Algorithms for the Vehicle Routing and Scheduling Problem with Time Window Constraints 254
Marius M. Solomon

Vehicle Routing with Time Windows 266
A. W. J. Kolen, A. H. G. Rinnooy Kan and H. W. J. M. Trienekens

Inventory Policy in the Presence of Market Disruptions 274
Hung-po Chao

A Method to Calculate Steady-State Disruptions of Large Markov Chains by Aggregating States 282
Brion N. Feinberg and Samuel S. Chiu

An Efficient Decomposition Method for the Approximate Evaluation of Tandem Queues with Finite Storage Space and Blocking 291
Stanley B. Gershwin

Comparison of Policies for Routing Customers to Parallel Queueing Systems 306
D. J. Houck

TECHNICAL NOTE

An Improved Lower Bound for Minimizing Weighted Completion Times with Deadlines 311
Uttarayan Bagchi and Reza H. Ahmadi

OR FORUM

Presidents' Symposium: Science and Professionalism in Operations Research 314
Hugh J. Miser

Presidents' Symposium: A Perspective on the Future of Operations Research 320
Saul I. Gass

OR PRACTICE

Determining Lot Sizes and Resource Requirements: A Review 329
Harish C. Bahl, Larry P. Ritzman and Jatinder N. D. Gupta

Optimal Selection of Ingot Sizes via Set Covering 346
F. J. Vasko, F. E. Wolf and K. L. Stott

ARTICLES

A Nonlinear Programming Heuristic for Computing Optimal Link Capacities in a Multi-Hour Alternate Routing Communications Network 354
Eric Rosenberg

A Convergent Interactive Cutting-Plane Algorithm for Multiobjective Optimization 365
G. V. Loganathan and Hanif D. Sherali

Scheduling Tasks with Due Dates in a Fabrication/Assembly Process 378
Bruce Faaland and Tom Schmitt

The Dynamic Lot-Sizing Problem with Startup and Reservation Costs 389
Uday S. Karmarkar, Sham Kekre and Sunder Kekre

98%-Effective Lot-Sizing for One-Warehouse, Multi-Retailer Inventory Systems with Backlogging 399
Joseph S. B. Mitchell

Strong Convexity Results for Queueing Systems 405
Arie Harel and Paul H. Zipkin

Approximating the Mean Time in System in a Multiple-Server Queue that Uses Threshold Scheduling 419
Randolph Nelson and Don Towsley

Using Standard Time Series to Estimate Confidence Intervals for the Difference between Two Stationary Stochastic Processes 428
Bor-chung Chen and Robert G. Sargent

An Algorithmic Aid for Intensity Measures of Consumer Preference 437
K. Pasumarty, D. F. Karney, and T. D. Morley

TECHNICAL NOTES

An Algorithm for Computing the Convolution of Poisson Negative Binomial and Geometric Distributions 445
Colm Art O'Cinneide and Helmut Schneider

A Note on the Weighted Tardiness Problem 450
Ram Mohan V. Rachamadugu

OR FORUM

British Operational Research in World War II 453
Joseph F. McCloskey

Presidents' Symposium: OR, A Post Mortem 471
